

UNLOCKING INSIGHTS WIRELESSLY WITH AEROLINK

WHAT IS AEROLINK

Aerolink unleashes your data's potential by offering a cutting-edge wireless gateway solution powered by LoRaWAN technology. With AeroLink, we bring you a seamless integration of low-cost, easy-to-install supplemental data, elevating your data analytics capabilities to new heights.

Aerolink empowers you to transform mainstream wired sensors into wireless ones. By leveraging standard industrial protocols, AeroLink enables effortless and wireless installation of off-the-shelf sensors. Say goodbye to the hassles of complicated wiring and embrace the simplicity and efficiency of AeroLink.

DATAPILOT SOLUTION

**Plug-n-Play Climate
Computer Intergration**

**30 mins Installation
& onboarding**

Primary Data Source

Aerolink

Widely Scalable

Low Cost

Easy to Install

Versatility

**Supplemental Data
(Optional)**

WHY IT MATTERS

1 - Cost Saving

2 - Scalability

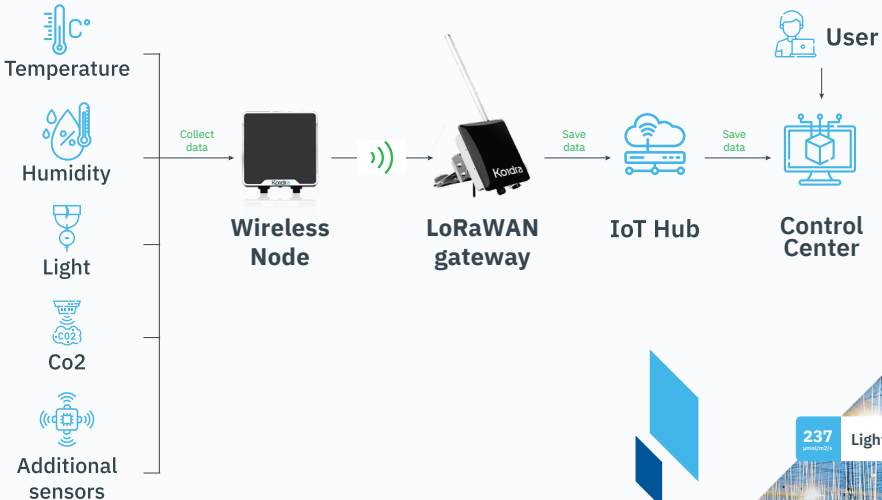

3 - Easy of Installation

4 - Versatility

HOW IT WORKS

AeroLink is an add-on to our already powerful DataPilot product. Once DataPilot setup is complete, you can effortlessly integrate AeroLink into your control system. Our intuitive Setup menu in the app ensures a smooth and hassle-free installation of additional sensors powered by AeroLink. This streamlined process guarantees a seamless transition and maximizes the value of your existing investment in DataPilot
